

Pre-Engineered Battery Dry Room Kits
Creating the Environment for Success

www.Airtho.com Info@Airtho.com (603)257-0002

Hello,

Wonderful meeting you at the Battery Show!

We appreciate your time coming by our booth to meet our team and check out the Airtho Battery Dry Room in person.

We love helping our partners by being able to supply, build, and commission the world's best battery dry rooms in record times with efficient energy usage and unbeatable quality.

Whether for 250 square feet or 55,000 square feet, we have fully engineered dry rooms with everything prepared for your project development needs from electrical requirements to working around your flooring constraints.

Let us walk you through the modular system that allows us to drastically reduce your engineering time and provide you the materials (including Dehumidifiers) onsite for giga-scale buildouts in only 6 months.

For more information and to be connected with an Airtho Engineer, send us a quick note or give us a call to get started.

Thank you again and we look forward to supporting all of your dry room needs.

Sincerely,
Brandon Bogart
