

2022 was a year filled with growth and opportunity here at Airtho, and we'd like to take a moment to recognize and share it with you!

Wishing you a warm holiday filled with joy, love and blessings!

Our **office will be closed from Dec 26-30** so that our staff can enjoy some extra time with their families and friends this holiday season.

Airtho's internal highlights included adding new team members, improving and expanding our product offerings and inventory of products and maintaining the quality, expertise and customer service that are Airtho's core.

We would like to especially thank our Partners and Supplier Vendors who are always a critical component to Airtho's success! In 2022 we added key new vendors and expanded relationships with our existing partners. THANK YOU ALL.

A real standout highlight for Airtho's capabilities, partners and commitment to performance is that despite the external challenges of 2022 Airtho was able ship 100% of the full solutions packages ON TIME. Since our quoted delivery times are already industry leading this meant that we were able to create the environments for our client's success in a fraction of the time of our competitors.

Airtho Solutions Growth

In 2022 Airtho saw SIGNIFICANT growth in our core full solutions industries including exciting projects and new clients in Lithium Ion Battery Dry Rooms, glass printing, and semi-conductor-technology.

Projects

Of all our client projects in 2022 these 4 stood out!

IM3

- Completed Construction of Giga-Plant dryroom
- 55,000 sqft dryroom space
- Airtho HEPA hubs HD save 3mw of energy/yr
- 75' Window wall for room viewing

Bendheim Glass

- Custom glass printer isolation room
- Custom modification to Airtho's perfect plenum system
- Airtho HEPA Hub with Cooling air conditioning and filtration system
- Client supplied glass walls

Anovion Battery Materials

- 3000 sqft Lithium Ion Battery R&D room
- Dryroom kit shipped in 3 months from client PO
- Custom Airtho Super Steel to avoid columns in the dryroom
- Energy efficient design featuring Airtho HEPA Hub HD for filtration and VRF heat pump system for sensible cooling
- 40' window wall for room viewing

Defense Industry

- 1300sqft softwall Isolator
- Airtho supplied solution including design, materials and installation for rapid and flexible isolation solution for duct sensitive process located within larger production plant
- Airtho's material stocking system allowed cleanroom kit to be delivered 2 weeks after client PO issued.
- Airtho Intelligrid and HEPA hub quickly installed in existing plant during weekend shutdown to keep production schedules intact
- ISO 7 space cleanliness with concentrated ISO 6 for critical process
